

EHLION | Sustainability & CSR

Responsibility in action |

We accept that our company has a responsibility towards society and the environment. That's why corporate social responsibility (CSR) and sustainability are such integral parts of our corporate culture. And we see that responsibility as the fundamental principle that dictates how we treat people and nature.

Respecting people and the environment |

We strive to treat everyone, from our employees to our clients and partners, with the fairness and respect they deserve. At EHLION, prioritizing the rights, interests and needs of our employees and customers is not only good for business — it's the right thing to do. And when it comes to the relationship between how we work and the environment, we endeavor to use methods and tools which allow us to reduce harm to nature and to limit our use of resources.

The EHLION Foundation: helping people help themselves |

Founded in 2013, the EHLION Foundation supports the work of a variety of non-profit organizations and projects in the form of donations. Examples include support for children's education projects in countries where many children don't have the opportunity to go to school and get an education. It is our firm belief that education is crucial to enabling people to determine the course of their own lives. And it is our hope that education will empower people to bring about the change needed to live a better, more fulfilling life.

About EHLION |

EHLION is an international company that offers language services in more than 80 languages and around 700 language pairs. We work exclusively with experienced and qualified translators who are native speakers in the languages they support. Our team of experienced project managers can handle even the most complex jobs professionally and efficiently.
